TECH SKILLS

Programming Language:

HTML5, CSS, TypeScript, JavaScript, C#, SQL

Frameworks & Technologies:

Angular 18+, Bootstrap, Angular Material, Kendo UI, ASP.NET, RESTful API Development, Ag Grid.

Database Management:

MySQL, Elasticsearch, Intersystem Cache.

Tools & Platforms:

Azure DevOps, Logstash, Filebeat, Kibana, Postman, Visual Studio, VS Code, GitLab, Jira, Mirai, Grafana .

SOFT SKILLS

- Communication & Collaboration
- Problem-Solving
- Adaptability and Quick Learning
- Technical Documentation

LANGUAGES

- Tamil (Fluent)
- English (Fluent)

PROFILE

Senior Software Developer with 4+ years of experience in designing and developing enterprise applications using Angular, TypeScript, .NET, and Web APIs. Proven expertise in delivering scalable banking and healthcare solutions, building responsive user interfaces, and implementing modern web technologies. Experienced in Elasticsearch, Agile methodologies, application modernization, and production support. Strong ability to collaborate with cross-functional teams, drive technical solutions, and deliver high-quality software aligned with business objectives.

EDUCATION

Bachelor of Technology (CSE)

2017- 2021

Periyar Maniammai Institute of Science & Technology
Thanjavur.

Allwin Higher Secondary School

2016 - 2017

Higher Secondary Certificate
Thanjavur.

CURRENT PROJECTS

DEC 2025 - PRESENT

TNSC Bank Digital Banking Platform

The TNSC Bank Digital Banking Platform provides secure Internet Banking, Mobile Banking, and Bill Payment services for cooperative banks across Tamil Nadu. The platform enables customers to perform banking transactions, manage accounts, access digital services, and make payments through a unified banking ecosystem. It supports bank-specific branding, customized user experiences, and seamless integration with multiple banking and payment service providers, delivering a modern and efficient digital banking solution.

Technologies Used: Angular 18+, JavaScript, HTML5, CSS3, JAVA, Github.

Role & Responsibility:

- As a Senior Application Developer, I lead the development and enhancement of Internet Banking, Mobile Banking, and Bill Payment applications. I work closely with business stakeholders and development teams to deliver scalable, user-friendly, and high-performance banking solutions.
- I have developed multiple new screens, modules, and feature enhancements across banking applications. I customized Internet Banking and Mobile Banking platforms for various Tamil Nadu cooperative banks by implementing bank-specific logos, themes, color schemes, and business requirements. I also developed reusable UI components and optimized existing features to improve application performance and maintainability.
- I collaborated with product owners, backend developers, QA teams, and client stakeholders to integrate more than 10 billing partners into the Bharat Bill Payment ecosystem. Additionally, I resolved production issues, participated in code reviews and technical discussions, and ensured the successful delivery of high-quality solutions in an Agile environment.

EXPERIENCE

TCS - ASML Validation Tools (AVT)

JUN 2025 - NOV 2025

The ASML Validation Tool (AVT) streamlines validation and verification of product-specific information for 6p=P industrialization deliverables. It standardizes the NPI process, reducing iterations to a maximum of five and accelerating time to market. The tool provides real-time visibility into validation status, follow-up actions, and open issues while integrating with existing ASML systems like GRE, AIR, and Coach. By automating data flow and improving collaboration, AVT supports faster industrialization, enhances operational performance, and boosts customer satisfaction.

Technologies Used: Angular 18+, JavaScript, HTML5, CSS3, Git, JIRA, Cypress

Role & Responsibility:

- As a Front-End Developer, I focus on delivering seamless, user-friendly interfaces by identifying and resolving customer-reported issues and optimizing existing features. I design and develop new UI components and screens, ensuring responsive layouts and consistent performance across browsers.
- I successfully migrated enterprise applications from Angular 18 to Angular 19 with zero downtime, improving compatibility, maintainability, and load efficiency. I also delivered multiple new screens and custom UI controls, enhancing both performance and user experience.
- Working closely with product managers, backend developers, and QA teams, I ensure timely, high-quality releases that align with business goals and technical standards. Recognized for consistent quality, proactive issue resolution, and on-time delivery in Agile environments.

DEDALUS - Laboratory Information Management System (LIMS), Audit Viewer & Job Scheduler

NOV 2021 - MAY 2025

Dedalus Laboratory Information Management System (LIMS) is an enterprise healthcare application that streamlines laboratory workflows by managing samples, test orders, results, instruments, quality control processes, and audit tracking. The system includes Audit Viewer and Job Scheduler modules that provide complete audit history tracking, background job management, monitoring, and real-time data visibility using the Elastic Stack.

Technologies Used: Angular 14/18, .NET, Web API, Elasticsearch 7.x/8.x, Logstash, Filebeat, Kibana, InterSystems Cache DB, HTML5, CSS3, Bootstrap

Role & Responsibility:

- Designed and developed scalable web applications using Angular, .NET Web API, HTML5, CSS3, and Bootstrap following Agile Scrum methodologies.
- Developed and maintained laboratory workflow modules for order management, test processing, result tracking, and audit management.
- Migrated applications from Angular 12 to Angular 14 and later upgraded Angular 14 applications to Angular 18, improving performance, maintainability, and user experience.
- Implemented Audit Viewer functionality to track end-to-end laboratory order and test result modifications, providing complete audit history and change visibility.
- Upgraded Elasticsearch from version 7.16.1 to 8.9.1 and subsequently to 8.17.0, ensuring system compatibility, stability, and enhanced features.
- Configured Elasticsearch security and authentication mechanisms to protect sensitive healthcare and audit data.
- Designed and implemented Elasticsearch Snapshot and Restore strategies for backup, disaster recovery, and data migration.
- Built data integration pipelines using Filebeat and Logstash to collect, process, and index application audit data into Elasticsearch.
- Developed processes to export application data into JSON format and ingest it into Elasticsearch for efficient search and analytics.
- Configured Kibana dashboards and search capabilities to provide real-time monitoring, auditing, and reporting functionalities.
- Implemented automated monitoring and alerting solutions for Elasticsearch clusters to proactively identify performance issues and maintain system health.
- Developed and maintained Job Scheduler modules to manage background services, recurring tasks, scheduling configurations, and execution tracking.
- Ensured seamless synchronization between Job Scheduler configurations and the LIMS application.
- Created detailed technical specifications and translated business requirements into scalable software solutions.
- Participated in sprint planning, code reviews, retrospectives, and production support activities.
- Investigated and resolved complex application, database, and search platform issues to ensure system reliability and performance.
- Optimized Elasticsearch queries and indexing strategies to improve search performance and data retrieval efficiency.

Declaration

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief. I understand that any false or misleading information may lead to the rejection of my application or termination of my employment if discovered later.
